DETAILED ACTION

1. Claims 1-12 are in the case.

2. *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 6, drawn to L is nonheterocyclic moieties, R1-R2 forms benzofuranyl ring, classified in class 546, subclass 197. If this group is elected, generic claims, 1-5, 7-9, 11 can be prosecuted together with the elected compounds.
- II. Claim 5 in part, drawn to L is dioxolane or tetrahydropyranyl, classified in class 546, subclass 207. If this group is elected, generic claims 1-5, 7-9, 11 can be prosecuted together with the elected compounds.
- III. Claims 1-5, 8-9, 11, drawn to remaining compounds, classified in class various, subclass various, depending on species election. The classification can only be determined upon election of a single disclosed species for which the remaining compound will be accessed. Further restriction based on the species will be made.
- IV. Claims 10 and 12, drawn to piperidinyl benzofused ring compounds, classified in class 546, subclass 197. If this group is elected, a further election of a single disclosed species is also required. Further restriction based on the species election may be required.

The inventions are distinct, each from the other because:

Compounds of groups I-IV differ in elements, bonding arrangements and chemical properties as to not being recognized to be of a general class of compounds. The search for each core structure is not co-extensive of each other. Inventions I-III and IV are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as starting material for compounds such as US 6,635,643 see col. 25-26 and col. 31 compounds 10-13 and the inventions are deemed patentably distinct since there is nothing on this record to show them to be

obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Celia Chang whose telephone number is 571-272-0679. The examiner can normally be reached on Monday through Thursday from 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang, can be reached on 571-272-0562. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
